WORK EXPERIENCE

Frontend Developer | Personal Projects

Building practical frontend skills with React

ZaikaHub

Developed a dynamic React application allowing users to search, view, and add recipes using a public API. Implemented React Router for navigation, deployed publicly on Netlify.

Adaptive ChatBot

Adaptive Chatbot — an AI-driven virtual assistant built to manage your tasks and organize your workflow. It helps you stay productive and in control through smart, adaptive task management.

EDUCATION

Eternal University | 2025-2027

Bachelor's of Computer Applications

- Building practical frontend and full-stack skills using JavaScript, HTML, CSS, React, Node.js, and MongoDB.
- Strengthening foundational programming knowledge in Python.

CERTIFICATION

Prompt Engineering for ChatGPT – Vanderbilt University via Coursera

Learned to craft effective prompts for AI models like ChatGPT. [View Certificate](#)

Version Control – Meta via Coursera

Learned version control best practices and collaborative workflows. [View Certificate](#)

Introduction to Git and GitHub – Google via Coursera

Gained foundational Git skills, including repository management and collaboration. [View Certificate](#)

MongoDB

MongoDB & Backend Learning – Self-paced /Online. [View Certificate](#)
